

## School Tree Club Starter Kit

### What Is a Tree Club?

A Tree Club is a student-organized initiative dedicated to the planting and preservation of indigenous tree species within and around the school premises. Members actively engage in educational activities related to climate action, environmental conservation, and the unique biodiversity of Kenya.

### Tree Club Goals

- Cultivate and maintain indigenous tree species within the school environment
- Acquire knowledge about native trees and their ecological and cultural significance
- Promote environmental awareness through creative expression, including art, drama, and storytelling
- Contribute to local reforestation initiatives
- Monitor tree development and share the impact of the club's activities

### What You'll Need to Get Started

ITEM	DESCRIPTION
A passionate teacher	To help guide and support the club
5–10 founding students	Start small and grow!
Space to plant trees	A garden, fence line, or open field
A few seedlings	Start with indigenous species like Moringa, Mukau, or African Olive
Tools	Basic tools like jembes, trowels, and watering cans
Club notebook or tracker	For recording growth, rainfall, species planted, and events
